

SUBGRADIENT

* GENERALISES GRADIENT TO CONVEX BUT NON-DIFFERENTIABLE PROBLEMS

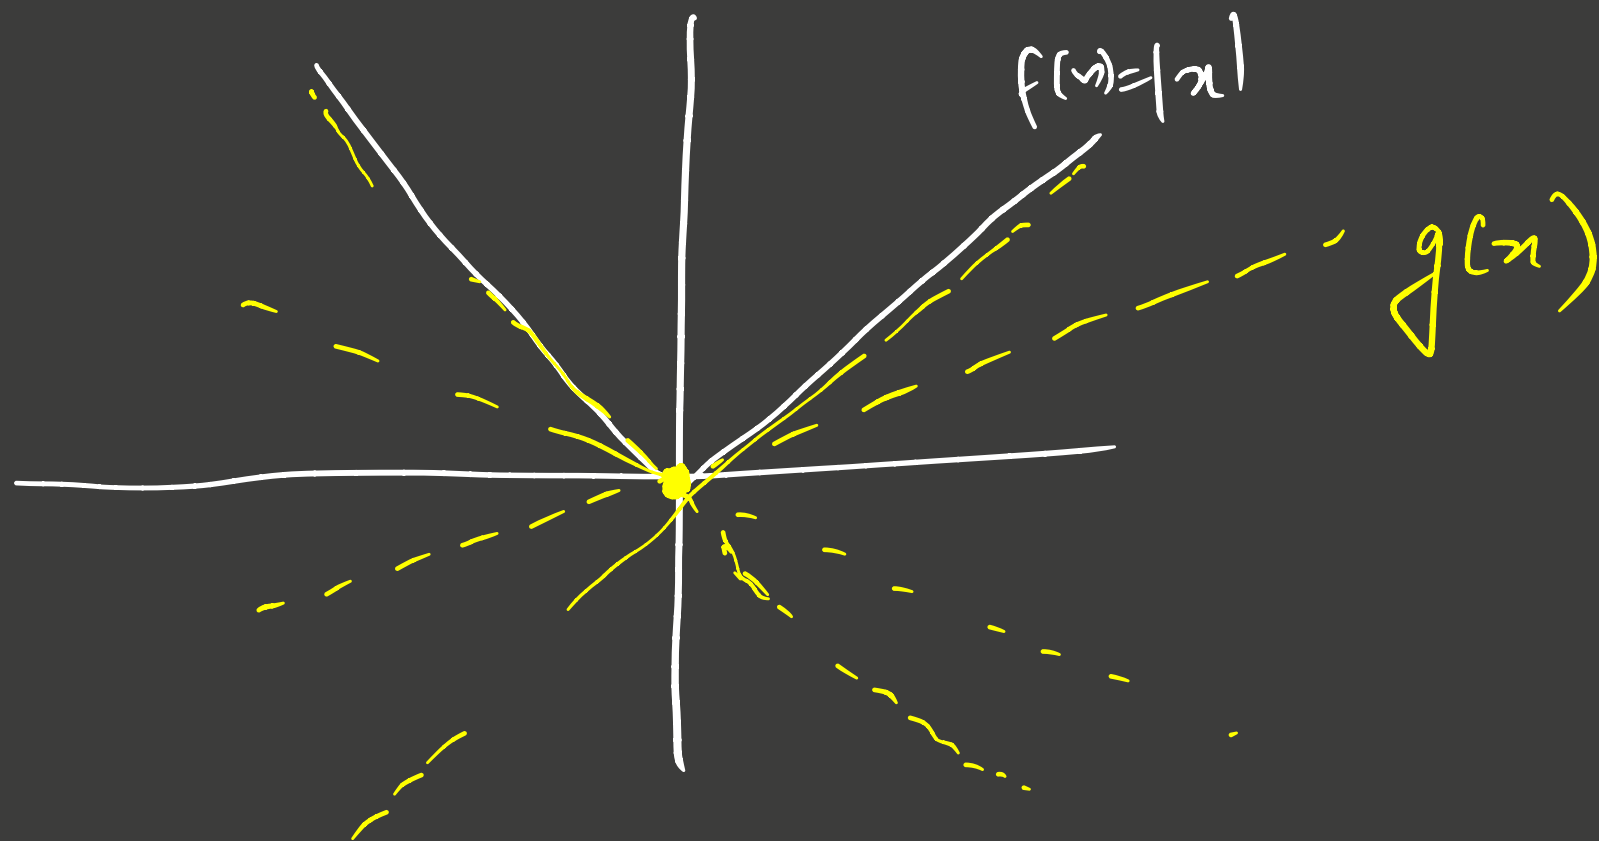

$\Rightarrow f(x)$ IS CONVEX
BUT AT $x = x_0$ NON-DIFFERENTIABLE

- $g(x)$
- ① TOUCH $f(x)$ at $x = x_0$
 - ② BELOW OR ON $f(x) \forall x$

COMPUTE SLOPES OF $g(x) \Rightarrow [a, b]$
SUBGRADIENT WRT $f(x)$

SUBGRADIENT OF $|x|$

SLOPE of $g(x)$ lies in $[-1, 1]$

$g_1(x) = -x$
 \Rightarrow touches $f(x)$ at $x=0$
 \Rightarrow always on or below $f(x)$

$g_2(x) = x$
 \Rightarrow touches $f(x)$ at $x=0$
 \Rightarrow always on or below $f(x)$
