

Dotfiles

(17110108) PITTALA NIKHIL

(18110058) G HARSHAVARDHAN

Sounds cool where can I find the dot files

As they are hidden files they won't be displayed if we use the "ls" Command.

How can I copy them if I can't find them

we can list them by using Command
ls-a

There are more dot files in the home directory than ordinary files.

Yeah I know we should save our dotfiles in a USB drive or cloud storage or Github repository which most people do.

This would completely save my time

You should also customize your tools in the way you like.
