

Feature Tour — ANSWER KEY

Duration: one leisurely read

Maximum marks: 17

SET A

Instructions

- Write your name and roll number before starting.
- This paper has 11 questions in 3 parts, for a total of 17 marks.

MCQ Answer Grid

Q	2	5	6	7	8	9	10
Ans	CD	A	B	C	A	C	B

Part A — Question Types

10 marks

Q1. A fill-in-the-blank: water is H₂O, and math answers work too: $e^{i\pi} = \underline{-1}$. [1 marks]

Q2. Two ✓ options turn a question into a multi-select automatically: *(Select all that apply.)* [2 marks]

(A) Also incorrect

(B) Incorrect

(C) Correct B ✓

(D) Correct A ✓

Q3. A booklet-style subjective question: `answer(none)` prints **no space** on the paper, but [2 marks]
the key still shows the model answer.

Model answer. Still here in the key.

Q4. A subjective question with a printed answer space and a grading rubric. [3 marks]

Model answer. The model answer — printed only in the key.

Rubric. +1 per correct point, up to 3.

Q5. A plain multiple-choice question — the ✓ marks the correct option, and option order [2 marks]
shuffles differently in every set:

(A) This one ✓

(B) Nor this one

(C) Not this one

Explanation. `\#explain[...]` appears only in the answer key, in this green box.

Part B — Option Control

4 marks

- Q6.** These options keep their authored order in every set (for I/II/III progressions): [1 mark]
(A) I only
(B) **I and II ✓**
(C) II and III
- Q7.** Two-column options via `\#opts(columns: 2)`: [1 mark]
(A) West (B) East
(C) **North ✓** (D) South
- Q8.** “None of the above” pins itself to the last position in every set — no annotation needed: [1 mark]
(A) **A real answer ✓**
(B) Another distractor
(C) None of the above
- Q9.** Compact inline options via `\#opts(compact: true)` — pick 4: [1 mark]
(A) 3 (B) 6 (C) **4 ✓** (D) 5

Part C — Stability*3 marks*

- Q10.** This question’s identity is frozen with `\#qid("...")`, so editing its wording never [1 mark]
reshuffles its options.
(A) Equally stable
(B) **Stable ✓**
- Q11.** This part is marked `\#section(shuffle: false)`: its question order is identical in [2 marks]
every set. When would you use that?

Model answer. When questions build on one another, or for a fixed easy-to-hard ramp.
