Feature Tour

Duration: one leisurely read Maximum marks: 17

SET A

Name: _____ Roll No.: _____

Instructions

- Write your name and roll number before starting.
- This paper has 11 questions in 3 parts, for a total of 17 marks.
- Record your final MCQ answers in the answer grid below — the grid is what gets graded.

MCQ Answer Grid

Q	2	5	6	7	8	9	10
Ans							

Part A — Question Types

10 marks

- Q1.** A fill-in-the-blank: water is H_2 _____, and math answers work too: $e^{i\pi} = \text{_____}$. [1 mark]
- Q2.** Two ✓ options turn a question into a multi-select automatically: (*Select all that apply.*) [2 marks]
- (A) Also incorrect
(B) Incorrect
(C) Correct B
(D) Correct A
- Q3.** A booklet-style subjective question: `answer(none)` prints **no space** on the paper, but [2 marks]
the key still shows the model answer.
- Q4.** A subjective question with a printed answer space and a grading rubric. [3 marks]
- Q5.** A plain multiple-choice question — the ✓ marks the correct option, and option order [2 marks]
shuffles differently in every set:
- (A) This one
(B) Nor this one
(C) Not this one

Part B — Option Control

4 marks

- Q6.** These options keep their authored order in every set (for I/II/III progressions): [1 mark]
- (A) I only
 - (B) I and II
 - (C) II and III
- Q7.** Two-column options via `\#opts(columns: 2)`: [1 mark]
- (A) West
 - (B) East
 - (C) North
 - (D) South
- Q8.** “None of the above” pins itself to the last position in every set — no annotation needed: [1 mark]
- (A) A real answer
 - (B) Another distractor
 - (C) None of the above
- Q9.** Compact inline options via `\#opts(compact: true)` — pick 4: [1 mark]
- (A) 3 (B) 6 (C) 4 (D) 5

Part C — Stability*3 marks*

-
- Q10.** This question’s identity is frozen with `\#qid("...")`, so editing its wording never [1 mark]
reshuffles its options.
- (A) Equally stable
 - (B) Stable
- Q11.** This part is marked `\#section(shuffle: false)`: its question order is identical in [2 marks]
every set. When would you use that?
